GENETIC TESTING

When you are around 12 weeks, we offer non-invasive prenatal testing (NIPT) through the company, Natera. This test will tell you if the baby has the three most common chromosomal abnormalities.

- Trisomy 13
- Trisomy 18
- Trisomy 21

It can also accurately predict the sex of your baby. Insurance companies don't often cover this test and it currently costs \$250. Learn more about the NIPT test [here](#).
